Extract
21,8 g/l

Recommended serving
temperature
6°

Aging potential
10 years and more

Varietal profile Chardonnay

Vineyard The Trentino hills most suitable for the production of Trentodoc spumante base wines, from vineyards that are older than 30 years.

Yield per hectare 45 hl

Picking In part the grapes are harvested upon reaching the ideal ripening parameters for the production of spumante base wines, and in part upon reaching their full biological ripening potential. Hand picking guarantees the selection of only perfectly healthy and intact grapes.

Production The intact and healthy bunches are directly placed into an air press and the must thus obtained is fermented without decantation partly in small casks made of French oak and Hungarian acacia and partly in stainless steel. Batonnage is carried out weekly until the end of December. The refinement in wood and stainless steel of the spumante base continues until the end of June. Refinement on the lees continues for at least 84 months.

Description Thin and persistent perlage. Its brilliant and luminous golden yellow color is a result of the long refining. Rich, ethereal, and of extreme elegance. The sensations of blond tobacco and bread crusts intermingle with nutmeg and apricots. Very rich in taste, interesting and savory; a long finish carries memories of liquorish and rhubarb.

Food recommendations It pairs perfectly with flavorsome yet delicate dishes, also excellent with aged cheeses, game birds, resolute dishes with a marked yet refined flavor.

Origin of the name Masetto comes from the Latin „Mansum“, a building with adjoining agricultural land, which was given as a reward to Roman legionaries. Since 1885 it is the place where the Endrizzi winery is located and expresses the identity of the Endrici family. Born as a „family reserve“ for private use, on the occasion of the winery's 130-anniversary celebration, the time has come to share this particular cuvée zero dosage with those who appreciate it's uniqueness.
